

PSYD80S: Current Topics in Theoretical Psychology
Spring, 1997
Instructor: A. Kukla (S-572)

Students will select, research, and write a 20-25-page term paper on a theoretical issue of their choice. A combination of group and individual meetings will be held to explore possible topics, suggest reading materials, and monitor the development of the analysis.

Due on February 3: a one-page description of the term paper, along with a tentative list of readings to be done. This will be worth 15% of the final grade

The term paper itself will determine 85% of the final grade. It is due at the last regularly scheduled class on April 7. One percentage point will be deducted from the term paper grade for each working day that it's late.
