**Textbook:** Oltmanns, T. F., & Emery, R. E. (1998). Abnormal Psychology (2nd ed.). Prentice-Hall: Englewood Cliffs, New Jersey.

**Lectures** will not be a chapter-by-chapter review of the textbook. Lectures will expand, clarify, update (and sometimes argue with) what is in the textbook, and will present additional information that Prof. Pauker considers important for the class to know and think about.

**Course grades** will be based on performance on three tests, with weights apportioned to the tests as follows: Test #1 - 25%; Test #2 - 37.5%; Test #3 - 37.5%.

**All three tests** will be in the form of multiple choice items, and will cover the assigned textbook chapters, any additional assigned readings, lectures, audiovisual presentations, and class discussion.

**Prof. Jerome D. Pauker can be reached at (416) 920-2637.**
