

TENTATIVE SUMMER SCHEDULE 2008
CURRENT TOPICS IN HUMAN BRAIN AND BEHAVIOUR
PSYD66

Instructor: Dr. Janelle C. LeBoutillier
Room S557A
leboutillier@utsc.utoronto.ca
Office Hours: Thurs 4:00 to 5:00

Lecture: Thurs: 5 to 7 pm, BV 363

Textbook: There is no textbook for this course. You will make use of the library to access primary source readings

Course Description:

The aim of this course is to conduct an intensive examination of a cross-section of selected topics and research problems in human brain and behaviour. Topics may include, but not be limited to, the neural bases of mental functions such as language, learning, memory, emotion, stress, motivation and addiction.

You may find that the seminar nature of this course is unlike many of the courses you have taken to date. In fact, the format of this course is similar to the type of learning experience you would gain in graduate school. As a result of the small class sizes of our D level courses at UTSC, there is a greater opportunity for independent learning. You are expected to read and discuss current empirical research in this field during our seminars.

Students with diverse learning styles and needs are welcome in this course. In particular, if you have a disability/health consideration that may require accommodations, please feel free to approach me and/or the AccessAbility Services Office as soon as possible. Tina Doyle, the UTSC AccessAbility Manager 416 287-7560 is available by appointment to assess specific needs, provide referrals and arrange appropriate accommodations. The sooner you let us know about your needs, the quicker we can assist you in achieving your learning goals in this course.

Grading Scheme

15%	Class Participation
18%	Oral Presentation
2%	Literature Outline
35%	Literature Review
20%	Critique of Literature Review
10%	Response to Reviewer Comments

Class Participation:

A weekly mark out of 3 will be assigned for participation. This will be based on active participation in the class discussions and background knowledge based on the assigned readings.

Students are expected to learn from each other by way of attendance and participation during presentations.

Oral Presentation:

Each student will give one oral power point presentation during the term. Following a brief overview of the subject area you will discuss in-depth your empirical paper. Topics to be presented will be assigned following the first week of classes.

Literature Review:

Students will write a review paper on a specified topic which will be a maximum of 20 pages. You are required to submit an outline for your paper on Thursday May 29, 2008.

Submission of Review Paper:

You are required to submit 3 copies of this paper, one paper with your name and student number and 2 without your name and student number. In addition, you are required to submit your paper to Turnitin (details to follow). Papers should be prepared according to the Publication Manual for the American Psychological Association, 5th Edition. This assignment is due no later than 4 pm on the Monday June 23. Papers can be dropped off to my office S557 or to the Life Sciences office (S521B). All papers will be assigned by me a manuscript number only.

Critique of Literature Review:

Each student will receive 2 review papers on similar topics identified by number only. You will be required to read these papers and provide a critique of the manuscript. These critiques will be a maximum of 2 pages due July 10, 2008. Students are required to turn in two copies of each of these evaluations, one with their name and student number and the other with only the Manuscript ID number. You will be evaluated by the instructor on your critique of the assigned literature reviews.

Response to Reviewers Comments:

A formal response addressing the concerns of the reviewers is due on July 31. This should be a maximum of 2 pages.

Late Assignments:

A penalty of 10% per day will be given for all late assignments. All assignments are due at the start of the lecture.

Turnitin:

First, some background information on this program. Turnitin.com is a tool that assists in detecting textual similarities between compared works i.e.: it is an electronic resource that assists in the detection and deterrence of plagiarism.

Students agree that by taking this course all required papers may be subject to submission for textual similarity review to Turnitin.com for the detection of plagiarism. All submitted papers will be included as source documents in the Turnitin.com reference database solely for the

purpose of detecting plagiarism of such papers. The terms that apply to the University's use of the Turnitin.com service are described on the Turnitin.com web site.

As indicated on the turnitin home page, all work submitted to Turnitin is checked against three databases of content:

- A current and archived copy of the publicly accessible Internet (more than 4.5 billion pages updated at a rate of 30-40 million pages per day);
- Millions of published works (from ABI/Inform, Periodical Abstracts, Business Dateline, ProQuest, the Gutenberg Collection of literary classics, and tens of thousands of electronic books);
- Millions of student papers submitted to Turnitin since 1996.

Students will submit all written reports to the turnitin.com site (www.turnitin.com). Detailed instructions on setting up your account can be found on this page. You must set up your own account and will need the following information: Course name, PSYD66; Class ID #, 2255988 ; Class Enrolment Password, summertime.
