

PSYC02H: SCIENTIFIC COMMUNICATION IN PSYCHOLOGY
Summer 2009

Instructor Anna Nagy
Office S415
Office Hours: Thursdays from 4-5 pm and by appointment
E-mail: a.nagy@utoronto.ca

Required Books

American Psychological Association. (2001). *Publication manual* (5th ed.). Washington, DC: Author.
Gelfand, H., & Walker, C.J. (2001). *Mastering APA Style* (5th ed.). Washington, DC: American Psychological Association.
Stanovich, K. (2004). *How to think straight about psychology* (8th ed.). Needham Heights, MA: Allyn & Bacon.

Introduction

Welcome to Psychology C02! This is probably one of the most important courses that you will ever take. This course will teach you the fundamentals of written communication, which are skills that may be applied in any setting. Discussion and questions are encouraged, both in class and in tutorials!

Objectives

The course deals with how we communicate in psychology, and why. The differences between scientific and non-scientific approaches to behaviour are stressed, and their implications for communication are discussed. The focus is on improving the student's ability to obtain and organize information and to communicate it clearly and critically, using the conventions of the discipline.

Skills acquired in this course are important to success in upper level courses, particularly for independent research courses and the thesis, and should be taken as early in the program as possible. Students will be reading the primary research literature, requiring the interpretation of research data; hence, PSYB01H and PSYB07H are prerequisites, and PSYC08H is a co-requisite for this course.

Assignments and Evaluation

APA Style: Students will work towards the mastery of APA Style by doing the exercises and practice tests for the two units in *Mastering APA Style*: the Term Paper Unit and the Research Report Unit. Observation of style is also a criterion in the evaluation of all written assignments.

Short Writing Assignments: There will be two short writing assignments. The first short assignment will be one page in length, and the second three pages in length. Content and style will be equally weighted in the evaluation. Further details will be given in separate handouts.

Major Writing Assignment: Each student will write a review article comprising some 10 to 12 pages of text on a topic that must be approved in advance. Content and style will be equally weighted in the evaluation. Further details will be given in a separate handout. An *outline* and a *draft* are to be submitted by specified dates.

Classroom Presentation: Students will make a short presentation in their tutorial of an empirical article that will be included in the review paper. The choice of article for presentation must be approved in advance. All students are expected to attend presentations by other students.

Final Examination: An examination of 2 hours will be scheduled during the final exam period, relating to the text by Stanovich.

Weighting of Evaluation Components

	Weight
Midterm #1--APA Style: Term Paper Mastery Test	10
Midterm #2--APA Style: Research Report Mastery Test	10
Short Writing Assignments (5 and 15 respectively)	20
Classroom Presentation	7.5
Tutorial Participation	2.5
Outline of review article	2
Draft of review article	3
Review Article (final manuscript)	25
Final Examination	20

Policy on Extensions and Lateness

Short Writing Assignments. Short extensions may be granted for good reason, such as illness, conflict of due dates with assignments for other courses, etc., but normally not more than once for a given student. If an extension has been granted before the assignment is due, there will be no penalty for lateness. If no extension has been granted, assignments will not be accepted more than 2 days (48 hours) late and a late penalty of 10% per day will apply. Please talk to the instructor or tutorial leader **before the due date** if you are having difficulties of any kind.

Outline and Draft: If no extension has been granted in advance, 1 point per day will be deducted.

Mastery Tests. Make-ups will be provided only in the case of properly documented illness, but of course you have two opportunities to write regardless. For the second writing of the Research Report Mastery Test, a make-up will be available only if there is a successful petition for a deferred examination.

Classroom Presentation. In the case of properly documented illness, the presentation may be rescheduled, as class time permits.

Review Article. Unfortunately, extensions for the final paper (of up to one week) require the approval of the Chair of Life Sciences and can be recommended only in the case of properly documented illness or other extreme adverse circumstances beyond the control of the student. Longer extensions require submission of a formal petition.

Psy C02 Summer 2009--Important Dates

May 7: No Tutorials

May 14: Library workshop (see blackboard for room number and details) (NOTE: DATE IS TENTATIVE)

May 21: First tutorial with group leaders (refer to web for group lists and classroom numbers).
Introduction and discussion of possible topics for major writing assignment

May 28: Last date for approval of empirical article for first short writing assignment.

June 4: First short writing assignment due.
Last date for approval of empirical article for presentation.
Presentation dates to be scheduled in tutorial

June 11: Outline of review paper due.

June 18: Second short writing assignment due.

June 25, July 9, 16, 23, 30: Student presentations in tutorial period.

June 25: Midterm #1 (Term Paper Unit)

July 2: READING WEEK—NO CLASS!

July 9: Draft of Review Article due.

July 16: Midterm #2 (Research Report Unit)

July 30: Final Review Article due.

During Final Exam Period (date and time TBA): Final exam on Stanovich
