Office hours: Tuesdays, 1:30- 2:30 or by appointment

Teaching Assistant: Tharsni Kankesan Ram
E-mail: tharsni@psych.utoronto.ca
Office hours: TBA

Textbook: *Research Methods in Social Relations* (7th edition)
Authors: R. H. Hoyle, M. J. Harris & C. M. Judd
Publisher: Wadsworth (2002)

Course Overview

This course covers research methodology in social psychology, including learning about specific techniques and also, more general principles of design and methodology. There will be two lab exercises, intended to give you experience with research techniques/approaches used in social psychological research.

Please note that for two classes, we meet in one of the Computer labs (BV 471). See the list of assignments for the specific dates when the class meets in BV 471. For these classes in the Computer Lab, you need a UTSC student account (same one as you would need to access the UTSC intranet). Make sure your account is active before the first session in BV 471.

Evaluation

For each of the two lab exercises, there is a paper based on the lab exercise. You will receive detailed information about each lab exercise and the paper for each one during the term.

In addition, there will be one examination, covering the required reading in your text throughout the entire term, as well as material presented in class during the entire term. This examination will take place during the final exam period. The format for the final exam is identification of concepts/terms and essay questions.

Each of the three components listed below is worth one third of the final course grade.

Paper for Lab Exercise 1: Due October 20
Paper for Lab Exercise 2: Due December 1
Examination: During the final exam period

Please check your e-mail regularly for any course-related updates or announcements. E-mail correspondence from you concerning this course should be sent from your University of Toronto e-mail address.

H1N1 statement: Students who have flu symptoms or suspect that they have H1N1 influenza should not come to class. Please see the website <http://www.preparedness.utoronto.ca> for further information. Absence due to flu-related illness should be recorded via the Student Web Service of ROSI (see information on <http://www.rosi.utoronto.ca>).
