PSYC26H3 S Spring 2013

Developmental Psychology Laboratory

Instructor: *Mark A. Schmuckler*

Office: *S-515*

Office Hours: Tuesday, 12:00 – 1:00 PM, or by appointment

Email: <u>marksch@utsc.utoronto.ca</u>

Class Website: http://www.utsc.utoronto.ca/~marksch/psyc26/c26-index.htm

Course Hours: Thursday, 12:00 - 2:00 PM

Course Location: MW 264

Teaching Assistant: Diane Mangalindan

Office: H-302E

Office Hours: Tuesday, 1:00 - 2:00 PM, or by appointment

Email: mangalindan@utsc.utoronto.ca

Teaching Assistant: Gelareh Jowkar-Baniani

Office: H-302E

Office Hours: By appointment only; please contact Gelareh for all email questions

Email: gjowkar@utsc.utoronto.ca

Text: Miller, S.A. (2013). *Developmental research methods*, 4th Edition. Englewood Cliffs, NJ:

Prentice Hall, Inc.

Overview of Course

The purpose of PSYC26 is to acquaint you with research in psychology in general, and with the methodology of developmental psychology in particular. You will do this in part by writing, but primarily by collecting data and by writing reports describing your research. The course is demanding, but it should also be enjoyable. Formulating research questions, collecting and analysing data, and writing and interpreting your results are among the most exciting parts of experimental psychology. Developmental psychology focuses on the process of change within and across the difference phases of the life-span. Reflecting the broad range of topics in this area, there are diverse research methods. This course will cover a sample of some of these approaches, as well as consider issues in research design as it relates to developmental concerns.

Course Requirements

There are several course requirements. First, there are a series of short assignments that you must complete. The length of these projects, and what they entail, will be discussed later in class. You will also be required to actually conduct an observational coding experiment in child development (making use of the day care facility at Scarborough), and to write an experimental report for this experiment. Finally, in addition to collecting data and writing a report, there is a textbook to be learned, as well as lecture material to be mastered. You will be expected to know this material, and to demonstrate your knowledge in the form of a midterm and final exam. Each of these exams will cover approximately half of the book. A rough outline of the lecture topics, as well as the due dates and relative weighting of these assignments, is given below.

PSYC26H3 S Spring 2013

General Topics, Readings, Course Assignments, and Due Dates

Below is an APPROXIMATE outline of the readings and topics to be covered in class. More specific information concerning each week's material will be given as the class progresses.

Week	Topic	Reading	Assignment	<u>Value</u>
Week 1	Introduction to Class			
Week 2	Scientific Communication	Ch. 11		
Week 3	The Nature of Science	Ch. 1	Assignment # 1	10%
Week 4	Research Methods I	Ch. 2 – 8		
Week 5	Research Methods II	Ch. 2 – 8		
Week 6	Research Methods III	Ch. 2 – 8	Assignment # 2	10%
Week 7	Midterm (T. B. A.)			25%
Week 8	Research Ethics	Ch. 10		
Week 9	Infancy	Ch. 12		
Week 10	Cognitive Development	Ch. 13	Assignment # 3	10%
Week 11	Social Development	Ch. 14		
Week 12	Aging	Ch 15	Assignment # 4	20%
T. B. A.	Final Exam			25%

All assignments are due by at the end of class. Penalty for unjustified late assignment: 1 mark per day (i.e., 1 day late, a B becomes a B-, and so on).
