E-mail: dionkk@utsc.utoronto.ca

Office hours: Tuesdays, Noon to 1 PM or by appointment

Teaching Assistant: Zoe Francis

E-mail : zoe.francis@mail.utoronto.ca

Office hours: TBA

Course Overview

This course focuses on learning specific techniques/approaches as well as discussion of more general issues related to social psychological research methodology. There will be two lab exercises, intended to give you experience with research techniques/approaches used in social psychological research.

Attendance at all classes is important. Each week there is a different component of the lab exercise. Each component is needed to move on to the next part of the lab exercise.

Evaluation

For each of the two lab exercises, there is a paper based on the lab exercise. You will receive detailed information about the requirements for each lab exercise and the format for the paper for each one during the term.

Each of the two assignments listed below is worth 50% of your final course grade.

Paper for Lab Exercise 1: Due October 20

Paper for Lab Exercise 2: Due December 1

Please check your e-mail regularly for any course-related updates or announcements. E-mail correspondence from you concerning this course should be sent from your University of Toronto e-mail address, using either your UTSCID or your UTORID.
