

Contact Information

Course Instructor

Steve Joordens

Email

psya02@utsc.utoronto.ca

Use only this e-mail address. Please do not e-mail Steve's personal account! If you send emails to any address other than this one, there is no guarantee that you will get a response.

Please include a meaningful subject line and your student number in all communication.

Office Hours

Mondays 10:30 – 11:30 AM
Wednesdays 2:00 – 3:00 PM
SW415

Note: Steve's office hours are for questions about course content (i.e. stuff that was in the lecture or textbook). For administrative concerns, please visit Ainsley.

Course Coordinator

Ainsley Lawson

Email

psya02@utsc.utoronto.ca

Use only this e-mail address. If you send emails to any address other than this one, there is no guarantee that you will get a response.

Please include a meaningful subject line and your student number in all communication.

Office Hours

Usually available for drop-in on weekdays between 9 AM - Noon and 1:30 - 4:30 PM. Email if you'd like to set up an appointment.

Room SW427C

Note: Ainsley's office hours are for administrative questions (assignment instructions, missed deadlines, accommodations, issues with SONA, etc.) For course-content questions, please visit Steve.

General Course Information

The study of human behaviour, and the processes and structures giving rise to it, is actually extremely broad. It ranges from issues such as basic brain structure and communication, to issues such as the way the behaviour of those around us affects our own behaviour. In general, the goal of our two Introduction to Psychology courses is to give you an introduction to research and ideas across the entire field of psychology.

This is Part 2 of that introduction and, in it, we will focus on topics such as a Developmental Psychology, Social Psychology, Personality, Intelligence, Language, Clinical Disorders, and the Treatment of Clinical Disorders.

The course is what is often described as a survey course, meaning we will try to give you a general sense of some different approaches to the study of Psychology highlighting some of the most interesting findings within each approach. Subsequent B level courses then focus on some of these approaches in more detail, and the hope is that after taking this Introductory course you will be in a good position to (a) know which sub-areas of Psychology you find most interesting, and (b) begin your studies of these sub-areas with a good general knowledge of that sub-area and how it related to other approaches within Psychology.

Lectures

We present the lectures for this course using what we term the **WebOption** approach. The WebOption approach combines traditional and web-based presentation of lectures in an effort to provide students with additional flexibility in terms of how and when they watch lectures. In the winter of each year PSYA02 is offered both in a traditional classroom setting (L01) and an online section (L60). As the lectures are given in the traditional section they are taped, then made available to the online section via streaming video, usually on the same day. We then use these streaming videos again in the summer term (L60) thereby allowing us to offer this course two terms of the year.

The only real difference between the traditional and web-based sections of this course is with respect to the lecture itself. Whereas the traditional approach requires you to be in class at a certain time, the web-based approach gives you far more flexibility in where and when you view the lectures. It also allows you to pause lectures (if taking notes, or if you need a washroom break perhaps) and you can also rewind if you missed part of a lecture. Given these features, many students prefer the web-based approach. In the summer session, only the web-based version of the course is available.

One last important note about my lectures: while my lectures will be inspired by your readings in the textbook and will often involve me discussing the same concepts, I will discuss them in different contexts and may even bring in some information not in your textbook. **You will be tested on both the textbook content AND the lecture content** so please make sure you watch all lectures and consider them deeply.

Textbook

The textbook we will be using for this course is called Psychological Science (1st **Canadian** Edition) and is authored by Krause, Smith, Corts & Dolderman.

In PSYA02 we will cover **Chapters 9 through 16** of the text in the order in which they appear.

Make sure you have the Canadian edition, not the American one!

Evaluation

With the exception of the final exam, all assessments will be performed online. A traditional in-person “sit down” final exam will occur during the exam period at end of term.

Grading Scheme:

4%	mTuner 1
6%	mTuner 2
8%	mTuner 3
10%	mTuner 4
12%	peerScholar activity
2%	“Academic Integrity Matters” module
5%	Other activity (TBD)
3%	Experimental participation (SONA)
50%	Cumulative final exam

YOU MUST PASS THE FINAL EXAM TO PASS THE COURSE. If you do not pass the final, exam but would have passed the course otherwise, you will receive a 45% grade in the course.

The deadlines for all course activities will be posted on the course Blackboard page. **Note that the deadlines are non-negotiable, and if you miss one because of an error on your part you lose the associated marks.**

mTuner

mTuner activities are enhanced, online multiple-choice tests that you will complete after every two chapters we cover. Each mTuner activity will contain 40 questions, and will cover the following chapters and their corresponding lectures:

mTuner 1:	9 and 10
mTuner 2:	mostly 11 and 12, but some content from 9 – 10
mTuner 3:	mostly 13 and 14, but some content from 9 – 12
mTuner 4:	mostly 15 and 16, but some content from 9 – 14

Detailed information on the dates for the mTuner activities and how to complete them will be available on Blackboard.

peerScholar

peerScholar is an online tool that helps develop your critical thinking skills. There are three phases:

- 1) You will write a short composition that presents an “argument” related to some issue specified by me (TBD).
- 2) You will be randomly assigned to anonymously evaluate assignments submitted by 6 of your peers. At the same time, six peers will be anonymously evaluating your work.
- 3) You revise your composition in light of the feedback you received, with TAs ultimately grading you on the final composition, the quality of the comments you gave to your peers, and the appropriateness of your revisions.

Detailed information on the dates for the peerScholar activity and how to complete it will be available on Blackboard.

“Academic Integrity Matters” Module

You will complete an online activity that will help you learn about the University’s policies on Academic Integrity.

Detailed information on the dates for the activity and how to complete it will be available on Blackboard.

Other Activity (TBD)

An additional activity worth 5% of your mark will be included in the course. The content of this activity has yet to be determined.

Detailed information on the dates for the activity and how to complete it will be available on Blackboard.

Experimental Participation (SONA)

With respect to experimental participation, many senior undergraduates, graduate students and faculty conduct research aimed at better understanding psychological processes. You will read about such research throughout the course, but to make what you read more concrete another component of the class involves you serving as a participant in ongoing research. Being a participant will give you the chance to interact directly with a researcher in the context of some specific experiment, and our hope is that you will come to a better understanding of psychological research through this experience. In a sense, this is the lab component of this course. **You earn 0.5 credits for every 30 minutes of participation up to a maximum of 3 credits.**

You use a system called SONA to find and schedule experiments. New experiments will be posted regularly. You earn your credits over the term as suitable experiments (i.e. ones that you want to do and that fit your schedule) become available. **Detailed information will be posted to Blackboard once SONA has been opened for the term** (usually starting the third week of class).

Some notes:

- If you sign up for an experiment but fail to show up for it, you will receive a **0.5 credit deduction** from your SONA grade. If you need to cancel an appointment, you must inform the researcher at least **48 hours** in advance.
- Similarly, if a researcher needs to cancel your appointment, they must inform you 48 hours in advance. If you have signed up for an experiment and the researcher fails to show up, you will still receive your credit.
- You must complete your experimental participation by the last day of classes for the term.

An **alternative assignment** will be made available during the last few weeks of class, for those who prefer not to participate in research studies, or who did not find any suitable experiments to participate in. The due date for the alternative assignment will be the same as the last day to participate in research. **Detailed information on the SONA alternative assignment will be posted to Blackboard.**

Cumulative Final Exam

Cumulative? What? That’s right, there are no midterms in this class, just one big exam waiting for you at the end. The final exam is composed of multiple-choice questions presented in a traditional manner (i.e. using pencil and paper, not online). So you will come in to an exam room, sit down with your peers, and write the final exam using scantrons while being supervised.

The exam covers the entire course, including EVERYTHING presented in the textbook chapters we covered, and EVERYTHING discussed in lectures. I will try very hard to be fair, focusing on what I view as the relevant issues rather than the picky details. But if it is in the text or in my lectures it is fair game.

The Registrar's Office is responsible for the scheduling of the exams, so we will not know the date until close to end of term. As we have more details about the scheduling and specifics of the exam, we will post them on the course Blackboard webpage.

Note: **YOU MUST PASS THE FINAL EXAM TO PASS THE COURSE.** If you do not pass the final exam but would have passed the course otherwise, you will receive a 45% grade in the course.

Missed Term Work

Everything described above is considered a compulsory part of the class. We believe the evaluation is most fair when all students complete all components with no special consideration being applied.

If you miss a course activity, **we do not offer extensions or make-up assignments.** That said, sometimes things happen. If you can provide documentation that proves you were incapable of completing an activity for a legitimate reason (legitimacy to be determined by the professor and course coordinator) then we may be able to **transfer the weight** of that activity to the final exam. Note that the final exam marks tend to be lowest of all the marks in the course, so it is not in your best interest to have more weight transferred to your final exam. You should avoid this option if at all possible.

YOU MUST FOLLOW THE PROCEDURE OUTLINED BELOW IN ORDER TO BE CONSIDERED FOR ACCOMMODATIONS FOR MISSED TERM WORK.

Missed Term Work due to Medical Illness or Emergency Policy:

All students citing a documented reason for missed term work must bring their documentation to Course Coordinator, Ainsley Lawson **within 3 business days of the assignment due date.**

All documentation must be accompanied by the departmental [Request for Missed Term Work form](http://uoft.me/PSY-Missed-Term-Work-Form) (<http://uoft.me/PSY-Missed-Term-Work-Form>).

In the case of missed term work due to illness, only an **original copy** of the [official UTSC Verification of Illness Form](http://uoft.me/UTSC-Verification-Of-Illness-Form) will be accepted (<http://uoft.me/UTSC-Verification-Of-Illness-Form>). Forms are to be **completed in full**, clearly indicating the start date, anticipated end date, and severity of illness. The physician's registration number and business stamp are required, as is the course information.

In the case of emergency, a record of visitation to a hospital emergency room or copy of a death certificate may be considered.

If your missed term work is disability-related, an email communication sent directly to the Course Coordinator (psychology-undergraduate@utsc.utoronto.ca) from a Disability Consultant at UTSC AccessAbility Services should be submitted.

If your missed term work is related to a U of T Varsity athletic commitment, an email communication sent directly to the Course Coordinator (psychology-undergraduate@utsc.utoronto.ca) from a coach or varsity administrator should be submitted

Documents covering the following situations are **NOT** acceptable: medical prescriptions, anything related to personal travel, weddings/personal/work commitments.

Forms must be submitted in person **within 3 business days** of the missed test or assignment. You will receive an email response from the Course Instructor / Course Coordinator detailing the accommodations to be made (if any).

Failure to follow any aspect of this policy will result in a denial of your request for accommodation.

TECHNICAL ISSUES:

- If there is a system-wide issue with any of our course activities, we will post an announcement.
- If you are personally experiencing a technical issue with one of our systems, we recommend trying a try a different browser or a different computer. If it is still not working, you are expected to come to campus and use one of the machines here. The computer labs on campus work reliably with our software so **we do not accept the excuse that your personal computer was not working, or you were experiencing issues with your internet connection.**
- If you have tried all this and are still experiencing issues, you need to document it. Take screenshots or videos and email the course account right away (BEFORE the assignment deadline).
- You are expected to **back up your written assignments as you work on them.** We do not accept the excuse that one of our systems failed to save your work. Submit your assignments at least an hour before they are due, to avoid slow connections at the last minute.
- **Technical issues need be reported BEFORE an activity is due.** Any problems reported after a deadline will not be accommodated.

INVALID EXCUSES:

Some examples of invalid reasons for missing an activity:

- issues with your personal computer/connection (you are expected to use a UTSC computer if this occurs)
- personal travel
- confusion about deadlines or instructions
- slow connections at the last minute (submit your assignments at least an hour before they are due)
- technical issues reported **after** the deadline for an activity

Note: If you are experiencing an ongoing health issue that is affecting your ability to complete your schoolwork, you should consider visiting [AccessAbility Services](#) to explore your options.

Issues with missed final exams are dealt with by the Registrar's Office, not the course instructors / administrators.

Details are available here: http://www.utsc.utoronto.ca/~registrar/current_students/deferred_exams

Other Notes

Academic Integrity

Academic integrity is essential to the pursuit of learning and scholarship in a university, and to ensuring that a degree from the University of Toronto is a strong signal of each student's individual academic achievement. As a result, the University treats cases of cheating and plagiarism very seriously. The University of Toronto's [Code of Behaviour on Academic Matters](#) outlines the behaviours that constitute academic dishonesty and the processes for addressing academic offences. Potential offences include, but are not limited to:

In papers and assignments:

- Using someone else's ideas or words without appropriate acknowledgement;
- Submitting your own work in more than one course without the permission of the instructor;
- Making up sources or facts;
- Obtaining or providing unauthorized assistance on any assignment.

On tests and exams:

- Using or possessing unauthorized aids;

- Looking at someone else’s answers during an exam or test;
- Misrepresenting your identity; and
- When you knew or ought to have known you were doing it.

In academic work:

- Falsifying institutional documents or grades;
- Falsifying or altering any documentation required by the University, including (but not limited to) doctor’s notes; and
- When you knew or ought to have known you were doing so.

All suspected cases of academic dishonesty will be investigated following procedures outlined in the Code of Behaviour on Academic Matters. If students have questions or concerns about what constitutes appropriate academic behaviour or appropriate research and citation methods, they are expected to seek out additional information on academic integrity from their instructors or from other institutional resources.

Students are highly encouraged to read the guide on [How Not to Plagiarize](#) and to take advantage of [writing resources](#) on campus. The keyword here is respect – a good educational context is one in which all parties respect one another’s perspective and opinions.

Note:

You may see advertisements for services offering grammar help, essay editing and proof-reading. Be very careful. If these services take a draft of your work and significantly change the content and/or language, you may be committing an academic offence (unauthorized assistance) under the *Code of Behaviour on Academic Matters*.

It is much better and safer to take your draft to the Writing Centre as early as you can. They will give you guidance you can trust. Students for whom English is not their first language should go to the English Language Development Centre.

If you decide to use these services in spite of this caution, you must keep a draft of your work and any notes you made before you got help and be prepared to give it to your instructor on request.

Personal Integrity

As I hope this syllabus shows, I take my responsibility to provide you with the best education very seriously. Part of that responsibility is to be fair with respect to how I assess your work. Part of that means judging all of my students using the same yardstick. What I have laid out above is that yardstick, the things I will ask you to do to show me what you have learned. So with this in mind please respect the following two values I hold close; (1) I firmly believe that marks are to be earned, not given ... so please never ask me to give you a mark unless you feel you have earned it, and (2) I feel it is unfair to offer any student an opportunity that I don’t offer to the entire class ... so please **do not ask for any sort of special treatment**. Instead, take the course seriously, understand the expectations laid out here, and just do your best.

Research Activity

As mentioned, this course includes many innovative new tools that I believe will enhance your learning. However, science is based on data, not beliefs, and as one interested in educational technologies I will be conducting research designed to assess the effectiveness of these tools. Thus, on occasion, we may ask you to fill out a questionnaire, or we may wish to perform various analyses comparing how students do on various components of the class. If you do not want your data used in any research, please let us know and we will take steps to exclude your data from any analyses.

TurnItIn.com

Normally, students will be required to submit their course essays to Turnitin.com for a review of textual similarity and detection of possible plagiarism. In doing so, students will allow their essays to be included as source documents in the Turnitin.com reference database, where they will be used solely for the purpose of detecting plagiarism. The terms that apply to the University's use of the Turnitin.com service are described on the Turnitin.com web site.

You're Not Alone!

There are almost 2000 students in this class, quite a transition from high school! However, I sincerely hope that you do not feel like we don't care about you ... we do! However, we obviously cannot look over your shoulder and know when you may or may not need help with something. THAT part we must leave up to you. But when you DO need help, I certainly hope we are there for you. We have set up a number of mechanisms to help you with any questions or issues you might have. Please take the time to follow the right path and you should get help soon. If we work together we can make the class feel welcoming and responsive to you, and manageable for us.

Administrative Questions.

Ainsley Lawson (SW427C) provides administrative support for this course. All administrative questions about the course in general, and specific course activities should be addressed to her at the course email address (psya02@utsc.utoronto.ca). Before emailing, check that the answer to your question has not already been addressed on the Blackboard page. Check the syllabus, course announcements, and individual activity pages before sending an email.

Use only the course e-mail address. Please do not e-mail Steve's or Ainsley's personal accounts! If you send emails to any address other than psya02@utsc.utoronto.ca, there is no guarantee that you will get a response.

Content-Related Questions.

For questions about the lecture/textbook, you should be visiting Steve's office hours. Your peers may also be able to help if you post the Blackboard discussion forum.

AccessAbility:

Students with diverse learning styles and needs are welcome in this course. In particular, if you have a disability/health consideration that may require accommodations, please feel free to approach me and/or the AccessAbility Services as soon as possible.

AccessAbility Services staff (located in Rm SW302, Science Wing) are available by appointment to assess specific needs, provide referrals and arrange appropriate accommodations 416-287-7560 or email ability@utsc.utoronto.ca. The sooner you let us know your needs the quicker we can assist you in achieving your learning goals in this course.
