PSYD37H3:
THE SOCIAL CONTEXT OF MENTAL HEALTH AND ILLNESS
Winter 2018

Instructor: Charmaine C. Williams, PhD, RSW
Class time and location: Thursdays, 11:00-1:00pm, BV 363
Office hours: by appointment
Email: charmaine.williams@utoronto.ca
Office phone: 416-946-8225

This is a required course for the Combined Mental Health and Master of Social Work Degree.

Course description and rationale:

This course explores how social practices and ideas contribute to the ways in which society, individuals and families are affected by mental health and illness. At this point in our history we understand mental illness and mental health to be largely influenced by biological factors, specifically, workings of the brain. At the same time, we have always known that social factors play a very strong role in promoting mental health and can make big differences in who gets mentally ill, who receives adequate and appropriate treatment, and who can achieve good quality of life after diagnosis of mental illness.

We will be looking at how social issues intersect with mental health and illness in this course. The scope of social will include local and global communities, popular culture, and ideologies linked to social justice and injustice. At the same time, this course will ask you to develop self-awareness around what you believe about mental health and illness and how that affects your view on the topics, your role as a member of society and, potentially, a future role as a health professional.

Important Dates

- Start of class: **January 11, 2018** *(This session is replaced by an online video)*
- Assignment 1 due: **February 15, 2018**
- Presentation/Final Assignment Proposal due: **March 1, 2018**
- Assignment 2 Presentation dates: **March 22, 29 and April 5, 2018**
- Assignment 3 due: **April 6, 2018**
## Course Materials

Most course materials are available through the University of Toronto Library system and listed, with links, on the Blackboard Learning Portal. In addition to journal articles, the course will make use of online videos and other sources.

| March 1 | The social context of diagnosis and treatment of mental illness      | General medicine takes human experience and attaches diagnostic labels to it that determine treatment, usually with medication or surgery. New medical diagnoses are discovered/invented and rejected. Does this get questioned the way psychiatric diagnoses does? Why do you think psychiatric diagnoses get such harsh scrutiny from outsiders but general medical diagnoses do not?

### ASSIGNMENTS AND EVALUATION

#### Writing Style Requirements

Please follow the guidelines in the 6th edition of the APA publication manual for format and citations in your written assignments. Students are encouraged to consult with campus writing centre if they feel challenged by writing assignments. All assignments must be submitted in electronic format (typewritten, 12 point font) through the Blackboard portal, unless directed otherwise.

Written assignments will be graded on their clarity, comprehensiveness, originality, appropriate use of reference materials and technical adequacy.
Grading Scheme: % of Final Mark Due Date
Assignment 1 30% February 15, 2018
Assignment 2 n/a March 1, 2018
Assignment 3 Presentation 30% March 22, 29, April 5, 2018
Assignment 4: Final paper 40% April 6, 2018

Assignment 1: Reflective Paper (approximately 6 pages, no references required aside from the citation for the paper chosen as a topic)

Papers will only be accepted for grading if they are submitted using the links on the portal. Submit one copy to the turnitin link to receive an originality report and a second copy to the Feedback link. Please consider submitting your assignment to the turnitin link early enough to review the originality report and make changes if needed.

- Choose one journal article from the assigned readings from the first ½ of the course (between January 11 and February 915)
- Reflect on the paper using the following questions as a guide:
  - What is one concept, idea, research finding, theory in this paper that you found new or intriguing?
  - Why do you think this particularly concept etc. is interesting or important (to you)?
  - How does it relate to what you have learned previously in your program about mental health and illness? How does it relate to what you have learned previously in your life about mental health and illness?
  - As you reflect on this concept etc., how do you think you could use or apply it in the future? What might you want to explore further in the area?
- Criteria for evaluation: writing quality, clarity, use of the guiding questions, creativity or originality in addressing the assignment.

Assignment 2: Proposal for presentation and final paper

- Topic of presentation and description of source material
- Issues to be addressed in the presentation and paper
- The proposal can be an uploaded document or a text submission.
- Submit your proposed topic and preliminary ideas to the link on the portal (Assignment 2 – Proposal for presentation and final paper)
Assignment 3: 10-minute presentation (preview of paper)
- Present the proposed topic of your final paper, explaining why you think it is a useful artifact to explore the social context of mental health and illness.
- Present the questions you plan to pursue in exploring it and why you have identified these as your questions.
- Audiovisual aids are recommended (e.g., powerpoint).
- See the presentation rubric for more details

Assignment 4: Final paper (10 pages)

Papers will only be accepted for grading if they are submitted using the links on the portal. Submit one copy to the turnitin link to receive an originality report and a second copy to the Feedback link. Please consider submitting your assignment to the turnitin link early enough to review the originality report and make changes if needed.

- Choose something from popular culture (e.g., TV series, movie, blog, vlog, twitter feed, ad campaign, fashion line, graphic novel, book, art exhibit....). Provide a description of this artifact*, providing links to supplementary material as needed. The artifact cannot originate from a health institutional source.
- Identify how you think it speaks to or represents the social context of mental health and illness, foregrounding one or more concepts from the course.
- Provide a critique of how you believe it promotes and/or undermines stigma against mental illness
- Describe what you see as lessons that can be learned from this particular artifact that could influence how we educate the public about mental health and illness
- Note:
  - Make explicit links to concepts and resources from the course
  - Demonstrate self-directed learning by drawing on additional sources to support your arguments.

*artifact: an object made by a human being, typically an item of cultural or historical interest

COURSE POLICIES

Learning Environment

We believe in an educational approach that fosters a positive working partnership between the instructor and students. Based on principles of adult learning, the class will be taught using a wide variety of instructional methods including lectures, large and small group discussions, videos, student presentations, etc. Students are encouraged to share their knowledge and experience in various aspects of the course content.

Academic Integrity

Students are expected to commit to the highest standards of integrity, and to understand the importance of protecting and acknowledging intellectual property. It is assumed that they have a clear understanding of how to cite references appropriately, thereby avoiding plagiarism. Common examples of problematic academic practices that lead to consequences for plagiarism include:

- Copying and pasting from an source and providing a citation but forgetting to put quotation marks around the content;
- Using material from a source and making changes in specific words or sentence structure but not citing the original source.
- Using ideas from a source without citing the original source.

Suspected plagiarism is immediately reported to the Chair’s Office. Please take the time to review your work carefully to avoid these consequences.
For more information on academic integrity, consult the Code of Behaviour on Academic Matters. You may also find it helpful to consult the document “How Not to Plagiarize“, available at http://www.writing.utoronto.ca/advice/using-sources/how-not-to-plagiarize.

For general writing assistance, consider consultation with the UTSC Writing Centre.

Turnitin.com: Students will be required to submit their course assignments through the Turnitin.com section of the portal for a review of textual similarity to other written work and detection of possible plagiarism. In doing so, students will allow their essays to be included as source documents in the Turnitin.com reference database, where they will be used solely for the purpose of detecting plagiarism. The terms that apply to the University’s use of the Turnitin.com service are described on the Turnitin.com website.

Students are encouraged to submit assignments early to detect and correct inadvertent errors in citation practices.

AccessAbility Resources

If you need or desire an accommodation for a disability or medical condition, please contact AccessAbility Services for assistance. I strongly encourage you to register immediately with Accessibility Services http://www.accessibility.utoronto.ca so they can assist us in making use of available resources to facilitate your learning experience. Consultations with AccessAbility Services are confidential and communicated to instructors with your consent, as needed.

Use of Electronic Devices in the Classroom:

In consideration of your classmates and your own learning, please turn off or mute your devices during class. Devices may be used to support learning activities in the classroom, for example, taking notes and accessing course readings under discussion. Non-academic use of laptops and other devices is not acceptable. For reasons of privacy as well as protection of copyright, unauthorized video or audio recording in classrooms is prohibited. Students using devices as part of accommodations are excepted from this expectation – please alert me if this applies to you.

Late assignments

A late assignment is deducted one grade point (i.e., from an A to an A-) for each day that it is late. An assignment is considered late as soon as the due date and time passes. Students are encouraged to submit assignments early to avoid late penalties due to technical issues. Problems with the Blackboard Portal will not be accepted as an excuse for late submission.
Students who need to seek extensions due to illness or other personal circumstances must provide appropriate documentation as soon as possible and arrange new deadlines.

Lost presentations: Students who are absent for their assigned presentation date without approved supporting documentation will receive a mark of zero for that assignment. If there is an approved reason for missing the presentation, students must contact me as soon as possible to make alternate arrangements.

Religious Observances

Please notify the instructor if religious observances conflict with class attendance or due dates for assignments so we can make appropriate arrangements for alternate scheduling of evaluations or make up of missed work.

Missed Term Work due to Medical Illness or Emergency:

All students citing a documented reason for missed term work (this includes assignments and midterm exams) must bring their documentation to the Undergraduate Course Coordinator, Ainsley Lawson, within three (3) business days of the term test / assignment due date. All documentation must be accompanied by the departmental Request for Missed Term Work form (http://uoft.me/PSY-MTW).

In the case of missed term work due to illness, only an original copy of the official UTSC Verification of Illness Form (http://uoft.me/PSY-MED) will be accepted. Forms are to be completed in full, clearly indicating the start date, anticipated end date, and severity of illness. The physician's registration number and business stamp are required.

Forms should be dropped off in SW427C between 9 AM - 4 PM, Monday through Friday. Upon receipt of the documentation, you will receive an email response from the Course Instructor / Course Coordinator within three business days. The Course Instructor reserves the right to decide what accommodations (if any) will be made for the missed work.
Note that this policy applies only to missed term work (assignments and midterms). Missed final exams are dealt with by the Registrar’s Office (http://www.utsc.utoronto.ca/registrar/missing-examination).

**Failure to adhere to any aspect of this policy may result in a denial of your request for accommodation.**

*Course Evaluation: Student Feedback Matters*

Course evaluations for this course will be completed through an online system. You will receive an email invitation at your mail.utoronto.ca email address that will direct you to where you can complete the evaluations for all courses that are in the online system.

The University of Toronto has updated course evaluation procedures to make them more convenient for students. Course evaluations are very important to ensuring the quality of education at this Faculty and informing the development of its curriculum.

The survey used to evaluate this course have been developed in collaboration between faculty and students and the university’s teaching and learning experts to ensure that it will provide information about teaching and learning that can be used to enhance and assure the quality of education here at the University of Toronto. If you would like more information about course evaluation at the University of Toronto, please consult http://www.teaching.utoronto.ca/teaching/essentialinformation/evaluation-framework.htm
