## Course Description

This course will examine many aspects of human behaviour as it relates to the legal system. When appropriate, special attention will be given to Canadian law. It will introduce students to research methods, important findings, theoretical perspectives, and applied problems in forensic psychology.

Students will be expected to recall previously learned facts, terms, and basic concepts from B-Level psychology courses. Because this is a C-Level course, students will be held to a higher standard of learning. Specifically, they will be challenged to apply newly acquired knowledge when they analyze and evaluate problems in forensic psychology.

## Tentative Schedule

The following topics will be covered in the course. The weekly schedule is a guideline and some topics will take more or less than a single lecture period to complete. At various points, guest speakers with specialized expertise will join our lectures to share their knowledge and experience.
